Dear Mr Roberts

Thanks for your recent note on climate change, I will read the attached information with interest.

I agree with you that the Prime Minister's broken promise makes trust a key issue for the election, and you'll note the Coalition has been very clear on our commitment to repeal the carbon tax.

I do know that climate change is a contentious issue for many; however I believe that humanity has had some impact on the environment, and regardless we should do what we can to improve our own back yard. Hence the Coalition's direct action plan, in which you appear well versed.

Yours sincerely
