Dear Mr. Jones:

Enclosed is a comprehensive report on climate science and corruption. It's entitled *CSIROh!* and encompasses appendices available here: <http://www.conscious.com.au/CSIROh!.html>

CSIRO and the Bureau of Meteorology were sent copies of the report. Both agencies were requested to identify any errors in the report and to provide empirical scientific evidence for their core claim that human CO2 caused global warming. Their responses failed to identify any errors in my report and failed to provide the necessary evidence of causation.

Appendix 13 details analyses of ABC programs. The ABC is misrepresenting climate science.

If you decide to continue claiming or implying human CO2 is warming the planet please send by March 29<sup>th</sup>, 2013 empirical scientific evidence and/or identify reports as the basis for your claim. If your evidence/source is not received by that date I'll assume you have no evidence.

After giving you the courtesy of first receiving this letter it will be posted together with your response alongside other similar correspondence: <http://www.conscious.com.au/letters.html>

You have considerable influence in Australia. I hope you agree that responsible journalism involves holding claimants accountable. Would you be willing please to restore ABC integrity by committing to hold academics and politicians accountable? In future please ask advocates for their empirical scientific evidence that human CO2 caused warming. I am willing to be held accountable for my report and will be pleased to meet with you to answer your questions.

Yours sincerely,

Malcolm Roberts
