Dear Madam/Sir:

Re: Request for information in accordance with the Freedom Of Information Act, 1982

This request for information is made in accordance with the Freedom of Information Act, 1982 and to meet my needs for reassurance, security and trust.

It follows the failure of Dr. Rob Vertessy in his response as Acting Director of Meteorology to answer nine of eleven questions I asked of the Director of Meteorology in my letter dated February 20th, 2012 sent by email and copied by Registered Post with Delivery Confirmation.

The failure of the Bureau of Meteorology to respond adequately to my simple and reasonable requests on a matter of fundamental importance to my family and me is troubling. I please seek the following information:

- Copies of all scientific advice to the federal government proving human production of carbon dioxide, CO₂ as cause of global warming or climate change;
- Copies of empirical evidence and logical scientific rationale held by the Bureau of Meteorology and scientifically proving human CO₂ to be causing global atmospheric warming.

Given the Bureau of Meteorology's prominent role and responsibility in advising government on climate I envisage that the Bureau should be able to readily and easily fulfil my request.

Yours faithfully,

Malcolm-Ieuan: Roberts.

Notes made from BOM's web site. Not included with letter above.

- √ be made in writing
 - √ state that you are seeking information in accordance with the FOI Act
 - √ specify the information you are seeking
 - √ provide contact details, including an email or physical address
- √ FOI requests should be sent via post or email to the FOI Coordinator.
