---

Dear Patrick.

**Re: Your reference 30/5693**

Thank you for your letter dated February 20th, 2013 received as an email attachment below.

This opportunity is taken to emphasise that, as stated in my FOI request, I seek BOM documents **proving** causation of global warming (aka global climate change) by human production of carbon dioxide, CO2.

As stated in my letter dated February 12th, 2013 that entails providing any document(s) that contain empirical scientific evidence and logical scientific reasoning proving causation. I do not seek documents, for example, on issues such as whether or not CO2 is warmed by longwave radiation. I accept that as fact. I am not seeking evidence on atmospheric temperature variations. I accept that global atmospheric temperatures fell modestly from 1958 through 1976 and then rose modestly from 1976 through 1998 with subsequent ongoing stasis for the last 15 years and possible start of cooling since 2006. Instead, I am seeking specific evidence and reasoning **proving causation** of global climate change by human production of CO2.

Thank you,

Malcolm-Ieuan: Roberts.

Dear Mr Roberts

Please find attached a letter acknowledging receipt of your FOI request. I will be in touch with you again to discuss the progress of your application.

Kind regards

Patrick
