Mr. Mike Carlton
Contributor
The Sydney Morning Herald
GPO Box 506
Sydney NSW 2001

Dear Mr. Carlton:

LAWFUL NOTICE OF DEFAULT

**SENT BY REGISTERED POST WITH DELIVERY CONFIRMATION
WITHOUT PREJUDICE AND IN GOOD FAITH**

You have not fulfilled my request made of you in my letter to you dated February 15th, 2013. It provided a copy of my investigation into climate science and claims made and/or implied by academics and agencies funded by government. It is supported with detailed empirical scientific evidence and logical scientific reasoning. It was formulated with assistance and material from some of the world's most eminent independent climate scientists.

I requested that you identify, specify and justify significant material errors in my report and to provide empirical scientific evidence and/or facts as your justification. Your failure to provide such evidence renders judgment by default and thereby endorses my claims and makes my report your default answer and the answer to which you agree.

Although not required to do so, I now give you a further fourteen days to rebut this notice of default. Failure to do so by Friday, April 12th, 2013 will render my claims as factual.

Failure by you to provide by April 12th, 2013 a specific factual rebuttal will trigger a Notice of Acceptance that you have accepted my claims to be true by way of judgment of default.

With sincere intent to assist, Mr. Carlton, I encourage you to respond honestly, factually and specifically to my invitation and to do so with substantiating evidence. It's your duty of care. Truth and honesty liberate.

In the interests of accountability and transparency this letter and any response(s) from you will be posted on the Internet and federal parliamentarians will be advised.

I'll be taking further action with your employer.

Initially your lies and smears did not bother me because I understand that lies and smears are a form of control and that underneath control there is always weakness. Playing the man using ad hominem and unfounded implied smears as in your article of August 4th, 2013 revealed your desperation.

I now see the need though to take formal action to end the smears because of Ben Cubby's recent tweets, recent publication by others of articles on the internet and in a prominent and respected newspaper* relying upon and/or citing your work and/or that of Ben Cubby. That is now affecting my work.

<http://www.theaustralian.com.au/opinion/cut-paste/smh-eco-hero-who-uncovered-anz-funding-hoax-should-come-out-of-his-cubby-house/story-fn72xczz-1226549834788>

Ben Cubby's lies by Twitter last month indicate he's prolonging the issue. Further, your falsities are upsetting for Suzi Smeed and annoying for the co-founders of TGM who have done nothing to deserve your unfounded and malicious smear contradicting reality and maliciously injuring people. To understand more please refer to the attached copy of my letter to Ben Cubby.

Combining these factors, your behaviour as a reporter contradicts the SMH's Code of Ethics and cannot be condoned.

Accountability and formal requests

I now formally request that you:

- Publicly retract the unfounded implied smears and misrepresentations you made about me and/or my views;
- Publicly retract your comments implying or stating or relying upon the falsity that I, The Galileo Movement or anyone associated with The Galileo Movement is anti-Semitic;
- Acknowledge publicly that you have no evidence of any anti-Semitic connections to me or to The Galileo Movement or to anyone associated with TGM and that your behaviour was unprofessional, unwarranted and is now regretted by you;
- Either provide empirical scientific evidence and logical scientific reasoning that human CO2 caused global warming (aka climate change) or publicly admit that you have no evidence for the basis of your implied and/or stated claims that human CO2 caused global warming or climate change;
- Either provide empirical scientific evidence and logical scientific reasoning that human CO2 caused global warming (aka climate change) or publicly retract your articles implying, stating or relying on the unfounded and false claim that human CO2 caused global warming;
- Itemise any specific items in my *CSIROh!* report, particularly in Appendices 13 (pages 30-40), 4, 4a, 2 and 5 that you consider to be significant material errors or admit that there are no such significant material errors;

- Provide your reasons and motives for misrepresenting The Galileo Movement, climate science and me or otherwise explain your behaviour.

I expect these requests to be fulfilled by you by Friday, April 12th, 2013. If by that date you are silent or fail to factually justify your position on any of the above requests I will legitimately and reasonably conclude that my position is accurate.

Yours sincerely,

Original personally signed

Malcolm-Ieuan: Roberts.

Enclosures:

- Copy of my complaint submitted electronically through the Press Council's web site and using its online Complaint Form
- Email exchanges between Malcolm Roberts and Ben Cubby, February 2013.
- *CSIROh!* report's Appendix 13, pages 30-40
- Letter from Malcolm Roberts to Ben Cubby, dated February 15th, 2013
- Letter from Malcolm Roberts to Ben Cubby, dated March 28th, 2013
- Letter from Malcolm Roberts to Mike Carlton, dated February 15th, 2013
- Transcript of Ben Cubby's interview of Malcolm Roberts, July 30, 2012
- Tweets by Ben Cubby No.1 *
- Tweets by Ben Cubby No.2 *
- Tweets by Ben Cubby No.3 *
- *CSIROh!* report's Appendix 4 on the empirical scientific evidence. No government funded organisation or academic has any evidence that human carbon dioxide caused global warming. I've personally asked all the most prominent academics and government agencies including CSIRO and Bureau of Meteorology (BOM) for evidence. Most replied. All, including CSIRO and BOM failed to provide evidence.

* *Volunteers' email address has been kept confidential: Xxxx. It can be provided if needed.*
