Tuesday, May 26th, 2009

The Hon Kevin Rudd MP
Prime Minister
Parliament House
Canberra ACT 2600

Dear Mr Rudd:

Re: YOUR OFFICE'S REFERENCE C08/50558 - Alex Gordon, Adviser, 19.11.08 and my reply of Wednesday, December 10th, 2008

Further to your office's reply citing your reliance on the IPCC's figures regarding the count of IPCC scientists and experts and further to the third paragraph in my reply of Wednesday, December 10th, 2008 I provide references revealing the IPCC's count of experts and scientists to be in serious error and seemingly misleading. These excellent reports may be found at:

http://mclean.ch/climate/docs/IPCC_review_updated_analysis.pdf and,
http://mclean.ch/climate/docs/IPCC_numbers.pdf

McLean advises that preparation of both papers required only some critical analysis and the ability to count. Where necessary McLean describes his data analysis method. The conclusions from his analysis are obvious.

These two transparently objective reports were made using IPCC data provided by the IPCC. It seems the IPCC can't even count its own members and does not even know what is a scientist.

I hope this new information is helpful to you. I trust you will see their significance. ie, the IPCC's claim that human activity was responsible for the global warming that ended in 1998 was endorsed by just five reviewers and that further, there is doubt they were objective scientists.

I trust you will see from the IPCC's own data that IPCC methods were highly compromised and not scientific. The IPCC cannot be relied upon. This is confirmed by many IPCC scientists internationally who have been speaking out for many years stating that the IPCC's methods are not scientific and that its conclusions and summary reports are not based on science. Indeed, some IPCC summary reports contradict science.

I hope you will gain further information from the e-mails I am sending to all federal parliamentarians.

Yours sincerely,

Malcolm Roberts
