

TO: **Senator Penny Wong**, (02) 6273 7330, Page 1 of 16  
FROM: Malcolm Roberts  
DATE: Wednesday, August 26th, 2009  
SUBJECT: **CONTINUING TO PROPOSE ANY ETS  
IS MISLEADING PARLIAMENT**

Senator Wong:

Further to my recent facsimile letters please find accompanying paper by John McLean entitled 'Why the IPCC Should be Disbanded'.

Four (4) papers by John McLean were previously sent to you by facsimile. That followed four (4) McLean papers sent by Australia Post Registered Post (Fr.31.07.09). That was concurrent with 70 e-mail letters sent to you almost daily commencing May 21. The papers and e-mails provided facts and comment on the IPCC. The e-mails provided additional references, many from IPCC scientists.

It is starkly clear and obvious that the IPCC's core claim that human action caused the modest global warming from the mid-1970's through to around 1998 is NOT supported by science. Worse, **the IPCC has been exposed for misrepresenting science and for misleading governments.**

The IPCC needs to be disbanded. Any programs based on the IPCC's core claim need to be disbanded. This includes abandoning any and all proposals for any Emissions Trading Scheme (ETS) or any climate/carbon tax.

In light of the evidence provided directly and indirectly through legitimate and credible scientific references, if you continue to propose any ETS or climate/carbon tax as a way to manipulate climate you will be misleading parliament.

I am sending you by Australia Post a copy of McLean's paper entitled 'Peer Review? What Peer Review? Failures of Scrutiny in the UN's Fourth Assessment Report'. Although sent to you by facsimile this morning, the colour charts impressively present IPCC data. They are illuminating.

Senator Wong, with your legal training, I'm confident you'll agree that it's unwise to obtain advice only from those holding a certain viewpoint. Thus, with due respect, I please ask whether you have sought advice on climate from scientists who doubt that Earth's modest warming period from the mid-1970's through to around 1998 was due to human action?

...../2

If you have, I request that you please provide the names of reputable scientists who take the position of doubting human causes of climate variation and with whom you or your office have consulted.

I will be pleased to provide additional scientific references for your staff and you and provide the names of solid and internationally eminent scientists with whom you could seek advice as an alternative to the discredited IPCC.

I consider McLean's documents to be vitally important to Australia's environmental and economic security. I remain available to answer your questions.
