

Ben Cubby @bencubby

"How do people reject climate science?" - a fascinating piece by @skepticscience bit.ly/RnrHuD #climate

Galileo Movement @GalileoMovement

@bencubby @skepticscience How can people accept climate science with no empirical evidence to support human contribution.

John Cook @skepticscience

.@GalileoMovement take cherry picking to new level, claim no empirical evidence for AGW despite sks.to/evidence

Retweeted by Greg M. Johnson

Galileo Movement @GalileoMovement

@skepticscience It amuses me when other people choose this page as empirical evidence of human contribution, but John Cook himself? Please

Galileo Movement @GalileoMovement

OMG @skepticscience just accused us of cherry picking! and then failed in providing empirical evidence of human causation. Happy days

John Cook @skepticscience

.@GalileoMovement Just guessing that you haven't bothered reading the evidence for AGW yet? Harries 2001? Evans 2006? Why not give it a go?

Galileo Movement @GalileoMovement

@skepticscience Neither Harries or Evans contribute AGW to humans production & neither explain why atmos warming trend ended 1998 Try again?

John Cook @skepticscience

.@GalileoMovement to be fair, I was being flattering when I said you cherry picked, you're plain ignoring the full body of evidence

Retweeted by Sheila NomNomDePlume

Galileo Movement @GalileoMovement

@skepticscience Empirical evidence that increase in human co2 caused slight increase in atmosh temps, a warming trend that ended in 1988

Galileo Movement @GalileoMovement

@skepticscience Are you going to try and convince me fingerprints are more important that empirical evidence?

Wendy Carlisle @Wendycarlisle

@skepticscience @galileomovement I don't know why you engage

Galileo Movement @GalileoMovement

Thanks @Wendycarlisle It's important to show @skepticscience lack empirical evidence to support human contribution.

John Cook @skepticscience

@Wendycarlisle LOL, you're right, don't know what came over me. Momentary lapse :-)
