DICKSON ACT 2602

Dear Dr Clark:

Re: Fundamental Questions on Global Warming Science

Last Friday Annemaree Lonergan was sent on your behalf a series of five (5) e-mails. These were simultaneously sent to scientists prominent in discussing global warming. Each e-mail contains fundamental questions on the science of global warming (climate change).

Due to the public nature of your position, you likely receive many e-mails. For this reason, printed copies of the e-mails accompany. The main text in each e-mail has been manually highlighted for your ease and convenience.

I'm confident you're aware there is much confusion and uncertainty about global warming. CSIRO publications that I've read include papers and reports as well as CSIRO web site articles. From these it seems CSIRO lacks any specific, scientifically measured real-world evidence of a causal relationship between human production of CO2 and global temperatures.

I hope your answers to my questions will fulfil my need for understanding the basis of CSIRO's claims that human production of CO2 drives global temperature.

Looking forward to CSIRO fulfilling its scientific responsibility to scientifically substantiate its claims and implied claims about global warming causation, I look forward to your answers.

Yours sincerely,

Malcolm Roberts
BE (Hons), MBA (Chicago)
Fellow AICD, MAIM, MAusIMM, MAME (USA), MIMM (UK), Fellow ASQ (USA, Aust)

Enclosures: Copies of five (5) e-mails sent Friday, March 19th, 2010 and entitled '**Professor David Karoly seems to need your assistance. E-mails 1-5 of 5**'
